

4kW MAXILIGHT

MAXILIGHT - the versatile alternative to the fresnel/softbox combination

Unique, patented design provides a high output, controllable, softlight from a compact, lightweight fixture

Configure the MAXILIGHT to deliver the precise quality of light required

Compact, lightweight and robust construction - only 24" (600mm) deep

Aluminised Nomex shell maximises output

Rapid access, multiple frame system enables the use of any combination of diffusion & filter

Attach standard Honeycombs and Fabric Grids for even greater control

Lamp-house utilises the highly efficient PAR 64 lamp providing a wide choice of power and beam-angle options

Individual switch control of each lamp

2-circuit feed facilitates use with domestic socket outlets and 2kW Dimmers

Remove Nomex shell and re-balance for use as a conventional maxibrute

Stand mount or hang

Easily transportable
